	<b>Revision Date:</b> 04/10/19

**Refer to the 'Decision Tree' form to verify if the product is to be cleaned.**

Our critical limit is a scientifically based value to which a biological, chemical or physical parameter is controlled at a critical control point (CCP) to prevent, eliminate or reduce the occurrence of a food safety hazard. Our limits and criteria are derived from sources such as regulatory standards and guidelines, literature surveys, experimental results, and experts.
