FOOD SAFETY PLAN: BPA STATEMENT		
Effective Date: 11/30/15	Review Date: 01/02/22	Revision Date: 01/02/22

Bisphenol-A (BPA) is a synthetic chemical that is added to many commercial products, including polycarbonate plastic food containers and the linings of aluminum cans. Research has indicated that exposure to BPA can lead to adverse health effects.

All packaging materials used by Edison Grain are food safe and are BPA-free. While Edison Grain does not test for the presence of BPA in its food products, we have no reason to believe that any product contains BPA.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Barnes", written over a horizontal line.

Jeffrey Barnes, President
Edison Grain Inc.
